Supplies needed:

ALL-13998-287 - 1 panel
2 yards of coordinating fabric for backing
- Fusible webbing
- Polyfil

Pattern Level: Enthusiastic Novice

"I am a total beginner and want to learn more!"

For individual use only - Not for resale

Step 1 – Cut the Fabric

Attach the fusible webbing to the back of the panel piece according to the directions provided by the manufacturer.

Cut out templates. Match them up to the corresponding images on the panel and trace the outline with a water solubile pen. Then use the same template to cut one backing piece in coordinating fabric.

Step 2 - Sew the Fabric

Pin the panel piece and backing piece together, right sides facing each other. Sew almost completely around the softie, leaving a small opening on the bottom.

Turn fabric right-side out and stuff with poly stuffing. Slip stitch the opening in the bottom closed. And you're done!
