Finished quilt measures 29" x 40"

Notes Before You Begin

- Read through all instructions before you begin.
- All seam allowances are 1/4" unless otherwise noted.
- Remember to measure twice and cut once!

Cutting Instructions

Cut:

From **Kona Curry**

- 18 strips- 1 1/2" x WOF (Width of Fabric)

From **Kona White**

- 18 strips- 1 1/2" x WOF
- 4 strips- 2 1/2" x WOF

From **Black Stripe**

- 2 strips 4 1/2" x 25 1/2" cut on a 45 degree angle (cut the fabric while it is folded in half to create two opposing angles).

Sewing Instructions

Prep:

Place 13 Kona Curry strips and 13 Kona White strips in a pile together. Create a separate pile for the remaining 5 Kona Curry and 5 Kona White strips.

Step 1: Make Strip Panels

Take your pile of 26 strips and begin sewing the Kona Curry and Kona White strips together, using a gentle curving motion. Iron seams open.

When 5-6 strips are sewn together, “square up” the section (*If the sections do not get “squared up” every few strips, the whole quilt top will be warped.*) The length will vary depending on how deep the curves are have been sewn.

Continue sewing sections of 5-6 strips. When all 26 strips have been sewn into sections and “squared up”, sew the sections to each other, using a regular, straight, $\frac{1}{4}$ inch seam. (The straight seams will keep the top from warping.)

Repeat Step 1 for the remaining 10 strips to create a second panel for the bottom section of the quilt top.

Step 2: Make Herringbone Panel

Sew together the two black stripe strips, to create the herringbone shape.

Finished rectangle will measure 8” x 25 1/2”

Step 3: Square Up Panels

"Square up" your first set of solid and white strips to 22 1/2" x 25 1/2" (the 22 1/2" may vary, depending on how the gentle curves were sewn).

Repeat for the second set of strips, approximately 7 1/2" x 25 1/2".

Step 4: Piece Quilt Top

Sew the first set of strips (22 1/2" x 25 1/2") to the herringbone panel, making sure the white side of the strip panel is sewn to the herringbone panel.

Repeat with the second set of strips (7 1/2" x 25 1/2") adding them to the bottom of the herringbone, with the white strip sewn to the herringbone.

You will use a regular, 1/4 inch seam when sewing these sections together.

Step 5: Add Borders

Sew the four 2 1/2" x WOF white border strips to the quilt top.

Baste, quilt and bind as desired.

Enjoy your quilt!
